

Kalevalakasino

The definite Finnish Casino for Finnish players, Kalevalakasino, draws inspiration from Finnish folklore. The name and themes are picked from the Finnish national epic, so Kalevalakasino is as Finnish as it gets!

The welcome deposit bonus spans from first to third deposit, and the player gets to choose the preferred bonus from two alternatives – essentially the choice is between larger bonus and higher wager requirements and smaller bonus with more relaxed wager requirements. The details are as follows:

First deposit:

100% deposit bonus up to €150 with 50x wagering requirement on bonus

or

30% deposit bonus up to €45 with 10x wagering requirement on bonus

Both choices also give the player 30 Iron Coins.

Second deposit:

75% deposit bonus up to 75€ with 50x wagering requirement on bonus

or

20% deposit bonus up to €20 with 10x wagering requirement on bonus
Both choices also give the player 30 Iron Coins.

So, in total the player has a chance to get up to 325€ in bonuses for the three first deposits as well as 90 Iron Coins.

But what are these Iron Coins?

Iron Coins are currency used in Kalevalakasino shop, where the player gets to buy bonuses of their liking. To put things into perspective, 90 Iron Coins are worth for instance 45 Free Spins on Play'n GO's immensely popular game Book of Dead. Book of Dead was used just as an example; when buying Free Spins, players naturally have a full choice regarding games and Free Spin values.

Players get Iron Coins and the more valuable Gold Coins as bonuses during their adventure in the world of Kalevalakasino. Using casino currency as a bonus means the players get to choose how to use it, which in turns means bonuses issued in Iron or Gold Coins are always relevant!
