

## OlaSpill

Aimed exclusively at the Norwegian market, OlaSpill has charmed players with its high functionality, simplicity, extensive game selection and fun gamification features. Therefore it's not surprising that it's become a player favourite on its very special niche market.

### Welcome bonus to the player's liking

Upon registration the player gets 20 Free Spins and 10 Silver Coins – this is to say, without deposit, just as a gift to try the casino and its features out.

And regarding Free Spins, all the winnings from Free Spins at OlaSpill are always free of wager requirements. What the players win, they also get to keep!

As for Silver Coins, they are currency used in the OlaSpill Marketplace. In the Marketplace the players have a chance to buy Free Spins or other bonuses according to their liking.

On the first three deposits, the players get to choose their bonus. Essentially the choice is between larger bonus and lower wager requirements. The details are as follows:

#### First deposit:

100% bonus up to NOK 3,000 with a 50x wagering requirement

*OR*

30% bonus up to NOK 900 with a 10x wagering requirement

#### Second deposit:

50% bonus up to NOK 2,000 with a 50x wagering requirement

OR

15% bonus up to NOK 600 with a 10x wagering requirement

### **Third deposit:**

75% bonus up to NOK 1,500 with a 50x wagering requirement

OR

20% bonus up to NOK 400 with a 10x wagering requirement

Also on each of the three deposit, the players get 30 Silver Coins, which they can use as they wish on the OlaSpill Marketplace. In total the bonus available to new players on their three initial deposits is a whopping NOK 6,500 and 90 Silver coins!

## **And the bonuses don't end there!**

The OlaSpill team regularly engages the players with messages and campaigns to boost their casino experience and keep them engaged. All messaging is tailored to specific player groups to ensure the communication is relevant and interesting to the recipient.

To further increase the relevance, OlaSpill campaigns mostly use Silver Coins or the more valuable Gold Coins as a bonus. Issuing bonuses in the casino currency means they are always appealing, as the players get to use their Coins how they please on the OlaSpill Marketplace. For instance the players buying Free Spins are able to choose a Free Spin value according their own preferences.

Aside campaigns and bonuses the communication typically relates to special events and new game launches. To our experience the latter is an excellent way to boost new games' visibility and popularity.

## **Gamification makes playing more fun**

In order to add to make playing more fun, OlaSpill has a Coin Meter gamification feature. When playing at OlaSpill, the players are filling the Coin Meter. When the Meter is full, they are awarded bonus Coins, which they, again, may use in the OlaSpill Marketplace as they wish. This provides players with more rewards and improves the casino experience.

## **Focus on the audience**

As OlaSpill is a casino exclusively for Norwegian players, the casino website and all the communication are naturally provided in Norwegian with English as the secondary language. Also customer service is available daily in Norwegian via email and chat.
